

Make it yours design idea

A little more choice for furniture
A home that feels more personal

Mix furniture shape, colour and pattern
without slowing down renovation

study case

Give decoration-minded players a little more authorship.

KNOWN CONTEXT

Homescapes connects match-3 puzzles with renovating and decorating a home

DESIGN HYPOTHESIS

**Let me keep this shape,
change the colour,
and choose the cushions**

A proposed player need—not a research quote.
Validate interest before adding complexity.

Goal: more self-expression, with the original quick path still available

One sofa own combination

Customise sofa

SHAPE

- Rounded
- Classic
- Compact

FABRIC COLOUR

- brown
- Coral
- Cream

CUSHION PATTERN

- Stripe
- Plain
- Botanical

- Cancel
- Apply

Keep the quick path. Make the creative path optional.

01	02	03	04
Finish a task	Choose a route	Preview details	Apply & continue
The eligible furniture item becomes available.	Pick a ready-made style, or tap Customise.	Change shape, colour and cushion pattern.	Save the combination and return to the room.

Fast exit: apply a preset immediately. Safe exit: cancel customisation with no loss.

Start with one room, not the whole house design

1

test room

3

eligible furniture items

27

combinations per item

3 shapes × 3 colours × 3 patterns = 27 curated combinations

no need to spend any currency

Proposed scope; combinations are not a count of unique art assets

Test ownership—not just extra taps.

FIRST: A SMALL USABILITY TEST

Ask players to make a sofa they like, apply it, then undo a change.

Watch for confusion, choice overload and a clear understanding of Cancel.

Ask: “Does this room feel more like yours?”

THEN: A CONTROLLED LIVE TEST

**Control: normal decoration flow.
Variant: optional customisation.**

Primary: room-ownership survey score.
Behaviour: adoption and completed edits.
Guardrails: exits, task completion, match-3 starts and technical errors.

Set thresholds and sample size in advance.

More expression and less friction

Choice overload	Keep presets first; reveal customisation only on request.
Art & performance cost	Limit the catalogue; test all combinations and target devices.
Weak player demand	Prototype first; reduce or drop the feature if value is unclear.

NEXT STEP

Build a clickable sofa prototype and test the decision flow.

Independent proposal • No player research or live-test results yet • AI-assisted concept visual
