## Product Designer + Full-Stack Developer

Astana, Kazakhstan / Astana IT University, senior year / Open to collaborations

PORTFOLIO      LINKEDIN      GITHUB      TELEGRAM

PROFILE

Product-minded designer and full-stack developer who takes ideas from problem framing and user flows through interface design, implementation and testing. Builds independent products across EdTech, language learning, responsible AI, retail and productivity, with particular attention to bilingual experiences, accessibility, privacy and honest product communication.

EDUCATION + CORE CAPABILITIES

EDUCATION

**Astana IT University**  
Senior-year student  
Astana, Kazakhstan

PRODUCT + DESIGN

Product definition / user flows / prototyping / usability testing  
Interface design / responsive systems / interaction design / accessibility

ENGINEERING

Frontend development / backend APIs / authentication  
Relational databases / automated testing / deployment  
Offline-first PWA workflows

TOOLS + SYSTEMS

JavaScript / React / Vite / Express / PostgreSQL  
REST-style APIs / structured content pipelines / CSV export  
AI feedback and speech-text workflows

INDEPENDENT PRODUCT EXPERIENCE

2026 / COMMERCE / RETAIL EXPERIENCE

## DOS Optics

A multilingual retail concept for a Kazakhstan eyewear brand, connecting frame discovery, a 3D catalog, salon search and vision-check booking in one customer journey.

ROLE

Product strategy, art direction, UX/UI design and frontend development

- Designed a Kazakh-first, three-language responsive experience with catalog, filters, product details, cart and account states.
- Connected digital discovery to a seven-city salon directory and privacy-aware appointment flow.
- Created the concept independently and presented the idea to DOS Optics for consideration.

SYSTEM / TECHNICAL SCOPE

Reusable catalog data, 3D product presentation, localized navigation, booking flow, salon directory and responsive frontend prototype.

STATUS

Proposal declined by DOS Optics; retained as an independent portfolio concept. Not commissioned or official.

VIEW PRODUCT

2026 / PRODUCTIVITY / BUSINESS TOOLS

# Focus10

A task and time-tracking product for freelancers who need to connect working hours to concrete tasks and projects, then understand the week through reports and exportable records.

## SYSTEM / TECHNICAL SCOPE

React frontend, Express API, PostgreSQL data model, authentication, reporting queries, CSV export and automated API tests.

## ROLE

Full-stack product development

- Built a no-sign-up, private 30-day demo workspace so users can experience the full workflow before registering.
- Connected one-click timers to task and project context, weekly reporting and CSV export.
- Implemented account conversion, protected sessions, guided onboarding and automated API tests.

## STATUS

Live independent product; bilingual marketing site, interactive demo and account flow available.

[VIEW PRODUCT](#)

2026 / LEARNING / PRACTICE SYSTEM

# Agylshyn

A bilingual browser-based platform that turns Cambridge grammar, vocabulary and IELTS coursebooks into a connected practice, feedback and review system.

## SYSTEM / TECHNICAL SCOPE

Browser-first PWA, structured exercise data, offline caching, validation tools, local progress, optional sync and responsive learner/teacher interfaces.

## ROLE

Product design, learning-system design, content engineering and full-stack development

- Unified multiple books through instant answer checking, progressive hints, mistake review and spaced repetition.
- Built deterministic content tooling, local progress storage, import/export, offline caching and optional account sync.
- Designed learner practice and teacher-facing progress views with keyboard and bilingual accessibility in mind.

## STATUS

Live product with mistake practice, spaced repetition, progress views, offline support and teacher workflows.

[VIEW PRODUCT](#)

2026 / LEARNING / READING

# Mountain

A private English-reading environment for books, articles and subtitles, with instant Kazakh translation and vocabulary review that stays attached to the original context.

SYSTEM / TECHNICAL SCOPE

Multi-format content ingestion, reading state, search, vocabulary records, contextual translation, reader preferences and one-time device connection.

STATUS

Independent product currently in testing; import resilience and long-term vocabulary review are next.

VIEW PRODUCT

2026 / AI / LANGUAGE LEARNING

# AIELTS

A bilingual IELTS practice tool for Kazakh-speaking learners, combining speaking, writing and study modes with structured criterion-level AI feedback.

SYSTEM / TECHNICAL SCOPE

Speech and text input, editable transcription, bilingual structured AI analysis, prompt workflows, criterion-level results and study states.

STATUS

Updated prototype; feedback is practice guidance and has not been independently validated as official scoring.

VIEW PRODUCT

ADDITIONAL DESIGN EXPLORATIONS

OFF//RECORD

Fictional culture-magazine experiment exploring editorial typography, art direction and responsive storytelling.

[qedqed.netlify.app](#) /

TESOKEU

A calm focus reader with a personal bookshelf, adjustable pacing, bookmarks and reading insights.

[tesokeu.vercel.app](#) /

2026 / LEARNING / FLASHCARDS + QUIZZES

# Akanki

A free, local-first flashcard and quiz app that connects deck creation, imported study materials, spaced review and self-check quizzes in one browser workspace.

SYSTEM / TECHNICAL SCOPE

Browser-based application, localStorage decks and progress, CSV/TSV/text imports, Mozilla PDF.js extraction and responsive study interfaces.

ROLE

Product design and frontend development

- Built deck and card editing, search, text/file imports and scenario-based quiz parsing.
- Connected four-rating spaced repetition, multiple-choice quizzes and local progress tracking.
- Added lecture-learning guides and browser-side PDF extraction without uploading study files.

STATUS

Independent browser app; study data stays locally on the user's device.

VIEW PRODUCT

2026 / TRAVEL / INTERACTIVE EXPERIENCE

# JORYQ Travel

A Kazakh/Russian travel portfolio demo for exploring Kazakhstan through tour discovery, route maps, comparison and immersive destination storytelling.

SYSTEM / TECHNICAL SCOPE

React, TypeScript, Vite, Leaflet/OpenTopoMap, bilingual tour data, local/session storage, accessible dialogs and reduced-motion interactions.

ROLE

Product design, interaction design and frontend development

- Designed six tour pages with filters, two-tour comparison and validated demo enquiry flows.
- Integrated Leaflet maps, schematic routes and bilingual place stories with sourced photography.
- Created day/night landscapes, opt-in ambience, a local travel passport and PNG postcard export.

STATUS

Portfolio demo with illustrative itineraries and prices; requests do not create real bookings.

VIEW PRODUCT

2026 / SERVICES / CREATIVE STUDIO CONCEPT

# MammaMia! Studio

A bilingual concept for a fictional Almaty photo studio and creative workshop, bringing photo-room rental, pottery and painting into a guided service-selection journey.

## SYSTEM / TECHNICAL SCOPE

React, TypeScript, Vite, routed service pages, bilingual configuration, schedule and pricing logic, SVG motion and responsive layouts.

## ROLE

Art direction, UX/UI design, motion and frontend development

- Designed Kazakh/Russian service pages, galleries and a schedule-aware enquiry form with price calculation.
- Created an Aegean-inspired visual identity and a scroll-driven illustrated pottery composition.
- Implemented form validation and a configurable WhatsApp handoff with reduced-motion support.

## STATUS

Fictional studio demo; schedule and prices are illustrative, with no live booking backend.

## VIEW PRODUCT

2026 / EDUCATION / COURSE DISCOVERY CONCEPT

# BAGYT Academy

A Kazakh/Russian website concept for a fictional learning academy, helping prospective learners explore language and creative courses and choose a next step.

## SYSTEM / TECHNICAL SCOPE

React, TypeScript, Vite, React Router, bilingual programme data, browser preferences, accessible modal focus and reduced-motion transitions.

## ROLE

Product design, interaction design and frontend development

- Built an interactive course compass, programme filters and detailed course pages.
- Connected two-programme comparison with a three-question, rule-based programme finder.
- Designed a validated demo consultation flow, keyboard interactions and responsive navigation.

## STATUS

Fictional academy demo; courses and fees are illustrative and consultations are not sent.

## VIEW PRODUCT

## CONTACT

Open to thoughtful product design, frontend and full-stack collaborations.
