PROFILE

Product-minded designer and developer taking independent products from user flows and interface design through frontend, APIs, databases and testing. Focused on multilingual learning, productivity and service experiences.

SKILLS

Design: product definition, user flows, prototyping, responsive UI, interaction design, accessibility.
Development: JavaScript, TypeScript, React, Vite, Express, PostgreSQL, REST APIs, authentication, testing, deployment and offline-first PWA workflows.

SELECTED INDEPENDENT PROJECTS / 2026

Focus10 Full-stack productivity product

Built a private guest workspace, task timers, weekly reporting and CSV export with React, Express and PostgreSQL; 127 documented automated tests.

Agylshyn Bilingual learning system

Connected 13 books and 937 units or sections through answer checking, progressive hints, mistake review, spaced repetition and offline practice.

Mountain Private language-learning reader

Designed and built multi-format reading, contextual Kazakh translation, vocabulary review, library search and device linking.

Akanki Local-first study app

Built deck editing, imports, spaced review, quizzes and browser-side PDF extraction; decks and progress remain on the device.

JORYQ Travel Interactive travel portfolio demo

Created bilingual tour discovery, comparison, Leaflet route maps, destination stories and postcard export; illustrative travel demo.

ADDITIONAL DESIGN CONCEPTS

MammaMia! Studio - bilingual studio and workshop demo.
BAGYT Academy - course discovery, comparison and programme finder.
DOS Optics - independent retail concept; proposal declined by the brand.
AIELTS - experimental bilingual AI practice feedback, not official scoring.

EDUCATION

Astana IT University / Senior-year student / Astana, Kazakhstan
